thermometer

Summarize

Fill in the missing words to tell about weather.

You can recognize clouds by their (4) shapes. (5) Cirrus

clouds are thin and wispy. Clouds that look like thin blankets are

(6) stratus clouds. The clouds that look like piles of cotton are

(7) cumulus clouds. Each different type of cloud means a different type

of weather is coming. Stratus clouds usually mean that light (8) rain

or snow is coming. If you see a cumulus cloud, you know that (9) fair

weather is coming. Some weather can be severe. (10) Hurricanes form over

ocean water. Strong winds and lots of snow occur during a (11) blizzard.
